Mr. Wareham and Mr. Ritchlin,

I have just spoken with Jim Fulton who has indicated to me that you are the people to speak with about salmon aquaculture related issues. I was not aware that Jim is not well. I am very sad to hear that. In light of that, I hardly have the stomach to proceed and send you the attached documents, but I must.

Recently I made a presentation to the Special Committee on Sustainable Aquaculture. As my presentation included some correspondence that I received from the David Suzuki Foundation some years ago, I am sending you a copy out of courtesy.

As I told the Committee, I am a huge fan of the David Suzuki Foundation and a supporter of much of the work that you do. I found it very difficult to prepare this presentation as it raises some very unpleasant questions.

I would appreciate the opportunity to speak with you about this at your earliest convenience.

I can be reached at 604.219.5905.

Sincerely,
Vivian Krause
